

The Thickening Gel You Can't Taste...

SIMPLYTHICK™ INSTANT FOOD THICKENER

SimplyThick™ instant food thickener originates from a simple idea: if a beverage looks and tastes like it's supposed to, people will drink more. Though simple, it's a concept that's never been achieved. Until now. SimplyThick uses technology available to the food industry for years, putting it in a form that meets the unique needs of the healthcare marketplace.

As the next-generation food thickener designed specifically for people who have swallowing difficulties, SimplyThick offers a clear solution to the problems that patients, their families and healthcare professionals encounter with products currently serving the market.

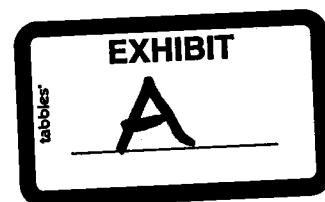

FEATURES	BENEFITS
flavorless	<ul style="list-style-type: none"> • unaltered taste • better patient acceptance
gel formulation	<ul style="list-style-type: none"> • no undissolved particles • no thickening over time • better patient acceptance
quick-mixing formula	<ul style="list-style-type: none"> • one-step preparation • no waiting to serve • minimized prep time
individual serving packets	<ul style="list-style-type: none"> • no measuring • consistent thickness every time • identical honey and nectar preparation • simplified training needs
hot and cold uses	<ul style="list-style-type: none"> • one product for all beverages • simplified inventory
freeze-thaw stability	<ul style="list-style-type: none"> • same thickness before and after freezing • thickened ice cubes for cold beverages

IMPROVING PATIENT ACCEPTANCE

SimplyThick's unique gel delivery system provides the basis for its benefits. The patent-pending gel formulation mixes quickly and completely by hand, without lumps or undissolved particles to detract from a beverage's appearance. Beverages are ready to drink as soon as mixing is complete. Beverage thickness is stable and consistent – whether hot, cold, or frozen and thawed – with no additional thickening or separation over time.

www.simplythick.com

REVISED 12/06/2001

SimplyThick adds no flavor to the beverages it thickens. Equally important, SimplyThick thickens all liquids – hot and cold – so menu options are dramatically increased. Water, juice, soda, ice, milk, coffee, tea, soups, beer, wine and mixed drinks can all be part of a thickened diet. SimplyThick can also be used in purees and other foods served to patients with swallowing difficulties.

Additionally, SimplyThick is a non-digestible food fiber and adds no calories to foods and beverages. It's ideal for patients on strictly controlled diets.

EASY TO USE

SimplyThick comes in pre-measured packets that eliminate the hassle of measuring different amounts of thickener for different beverages or diets. Available in nectar and honey consistencies*, each individual serving-size packet thickens a 4-oz. (120 ml) beverage. This means that, for a given consistency, SimplyThick is used in the same quantity in all beverages. Results are the same each time, and no special measuring spoons or containers are required.

* Pudding-thick consistency is achieved by doubling the honey dosage.

EASY TO PURCHASE

SimplyThick is available through distributors and is also available direct to both facilities and to home users. To order, check with your distributor, visit www.simplythick.com, or call 800-205-7115 anytime day or night. Orders received Monday through Friday before 3:00 PM central time will be shipped via UPS on the day the order is placed. All other orders will be shipped on the next business day.

THE CHOICE IS CLEAR

SimplyThick's qualities and benefits are unparalleled in the marketplace. In fact, patients prefer SimplyThick¹. The bottom line is quick, simple preparation, and beverages that look and taste exactly like they're supposed to.

DISCLAIMER – Although information provided is believed to be true and accurate, Phagia-Gel Technologies (PGT) cannot anticipate all actual situations and/or conditions of use. PGT cannot assure the suitability of SimplyThick™ for any particular situation or that SimplyThick™ will work in every situation. The Food and Drug Administration has not evaluated nor approved SimplyThick™ as a swallowing aid. Do not self-diagnose or self-treat swallowing problems, also commonly termed dysphagia. Swallow problems and/or dysphagia can be a serious medical condition that should only be treated with proper medical supervision. If you have any questions about use of SimplyThick™, consult your doctor or physician.

1 Preference claim is based on a double-blind taste test of SimplyThick™ Instant Food Thickener versus a starch-based instant food thickener. Respondents were all people currently or recently long-term care residents under doctor's orders for a thickened diet.

simplythick™

The Thickening Gel You Can't Taste™

USING SIMPLYTHICK™

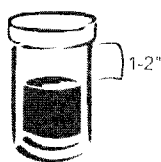

Follow these steps for mixing or shaking and you'll be enjoying SimplyThick – our revolutionary food and beverage thickener – in less than a minute.

TIP Mix one SimplyThick packet for each 4 oz = 120 mL = 1/2 cup

SHAKING THE FASTEST WAY TO ENJOY SIMPLYTHICK

1. Measure multiples of 4 oz. of beverage into container and add appropriate number of SimplyThick packets.

2. Ensure that there is at least 1-2" of empty space at the top of the container and put lid on container.

3. Shake vigorously for 5-10 seconds, then enjoy SimplyThick!

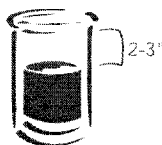

TIP Shaking hot or carbonated beverages is **NOT** recommended.

HAND MIXING

1. Measure multiples of 4 oz. of beverage into container and add appropriate number of SimplyThick packets.

2. Ensure that there is at least 2-3" of empty space between the liquid and the rim of the container.

3. Mix briskly with fork – like beating an egg – for 20-30 seconds.

TIP Mixing SimplyThick with a spoon is **NOT** recommended.

REVISED 1/09/2002

Mixing SimplyThick into beverages provides nectar and honey consistencies in favorites like:

soda pop
juices
coffee
hot chocolate
beer
milk

water
nutrition drinks
tea (hot or iced)
broth
wine
ice

TIP If you have problems getting SimplyThick to work with a powder drink mix, try thickening the water before adding the powder.

TIP Blenders, hand mixers and whisks are also great tools for mixing SimplyThick.

SIMPLYTHICK™ PRICING AND ORDERING INSTRUCTIONS

Purchase Methods

Orders may be placed via telephone, Web site, mail or fax with credit card or prepaid. Purchase orders must be placed via mail or fax. No verbal purchase orders will be accepted. Phagia-Gel Technologies, LLC allows purchase orders after credit approval. Terms are Net 15.

How to Order

Credit card orders may be called to 800.205.7115 or placed via the Web at www.simplythick.com.

Purchase orders may be faxed directly to 314.997.1351.

Check, credit card and purchase orders are acceptable by mail. Orders may be mailed to 1374 Clarkson Clayton Center, St. Louis, Missouri 63011.

Packaging

Nectar is packed 200 10g packets per box, 6 boxes per case.

Honey is packed 100 25g packets per box, 6 boxes per case.

Pricing

QUANTITY	PRICE
Single boxes	\$59.95/box
2 cases (12 boxes)	\$611.40 (\$50.95/box)
10 cases (60 boxes)	\$2,787.60 (\$46.46/box)
24 cases (144 boxes)	\$6,042.24 (\$41.96/box)

Whole honey and nectar cases may be combined to qualify for discounts. Discounts apply to whole cases only.

Freight

FOB Saint Louis, Missouri. Freight is prepaid and added or customer-routed unless negotiated otherwise prior to order. Shipping instructions must be identified on the order. Orders under 800 lbs. will be shipped UPS, orders over 800 lbs. will be shipped common carrier. 800 lbs. is approximately 20-26 cases of SimplyThick. One skid contains 24 cases. Skid dimensions are 40" x 48" four-way skids with a 51" height.

Return Policy

Returns will be accepted for shipping damage and manufacturing errors.

REVISED 1/09/2002

The Thickening Gel You Can't Taste.

USING SIMPLYTHICK™ INSTANT FOOD THICKENER

Using SimplyThick™ instant food thickener is quite simple. SimplyThick thickens all liquids – hot and cold – so menu options are dramatically increased. Water, juice, soda, ice, milk, coffee, tea, soups, beer, wine and mixed drinks can all be part of a thickened diet when SimplyThick is used. Purees and other foods served to patients with swallowing difficulties can also be thickened with SimplyThick.

HOW SIMPLYTHICK WORKS

SimplyThick is a gel consisting of pre-dissolved thickener. This means the thickener that is the basis of SimplyThick is already completely dissolved when it is packaged. When added to a beverage, the gel is dispersed by agitation and provides the diet-appropriate thickness. Because there is no powder, there are no undissolved clumps. Since all of the thickener is already dissolved, there can be no additional thickening once mixing is stopped.

It is important to realize that the thickener in SimplyThick behaves very differently in solution than other thickeners. The nature of the thickener in SimplyThick is to appear very thick when undisturbed but much thinner when mixed or poured. This characteristic and the clear solutions that SimplyThick produces mean that the visual cues used in the past to judge beverage thickness may not work with SimplyThick.

There are two simple visual cues that SimplyThick is working in a beverage. First, look for small air bubbles entrained in the beverage. SimplyThick will trap these air bubbles when the beverage is thickened. Second, look for large undispersed gel particles in the beverage. If these are present, the gel needs more mixing. If absent, the gel is fully dispersed and the beverage is ready to drink.

When first using SimplyThick, it may be a good idea to have an in-service where staff can mix SimplyThick in different beverages and see how it looks and acts. The real proof that SimplyThick is working is how thick it feels in the mouth; at first, a taste test can provide reassurance, if necessary.

HOW LONG DOES IT TAKE?

Preparation time depends on the combination of the beverage and the method of mixing. Good rules of thumb are that shaking will take under 10 seconds, mixing with a machine will take under 30 seconds, mixing with a whisk or a fork will take under 60 seconds, and mixing with a spoon may take several minutes.

(continued)

THICKENING WITH SIMPLYTHICK

SimplyThick can be used with a variety of mixing devices – forks, whisks, blenders, food processors, etc. – and also can be shaken. Shaking SimplyThick into beverages is the fastest way to get SimplyThick dispersed. Following are some tips.

Shaking

Shaking is fast and efficient, but there must be an inch or two of headspace between the beverage and the top of the container. Otherwise, shaking does not produce much agitation and SimplyThick will not be able to disperse.

Shaking carbonated beverages is discouraged as the foam and pressure will build in the container.

Shaking hot beverages is NOT recommended. Improperly insulated containers can become hot very rapidly and improperly sealed containers could leak hot fluid during shaking. In addition, pressure build-up could cause hot liquid to spray out of the container when opened.

Mixing

It takes a combination of agitation and time to fully thicken with SimplyThick, so the better the mixing, the shorter the preparation time. Gentle mixing – like the kind used to add creamer to coffee – will not allow SimplyThick to properly disperse. Dispersing SimplyThick into a beverage is similar to beating an egg. Watch for suspended air bubbles to indicate that thickening is complete.

When using hand utensils, whisks are highly recommended, followed by forks. Beat SimplyThick briskly into the beverage to achieve thickening. Spoons are NOT recommended as whisks and forks provide better mixing action and will disperse SimplyThick more quickly.

There are no special considerations when using machines like blenders, food processors or hand mixers to prepare larger quantities of thickened beverages or purees. Just mix long enough to ensure full dispersion.

To avoid splashing over the top of a cup when mixing SimplyThick,

- Use a larger cup than normal to prepare the beverage, or
- Add SimplyThick to the cup with only half of the beverage in it. Properly disperse SimplyThick in the first half of the beverage. SimplyThick will now be mostly diluted and will no longer require vigorous mixing. Add the remainder of the beverage to the cup and mix the two portions together.

When using multiple packets of SimplyThick, add all the packets you need and then mix the beverage. It is not necessary to disperse each packet individually before adding the next one.

When using SimplyThick with beverages made from a powder mix, thickening the water before adding the powder mix may produce the best results. The most common example of this is hot chocolate.
